Demand is soon to be piped by this company to Texas.

The oilfield has petroleum coming from Shawnee in drilling at 600 feet to 1777 ft. Superintendent Tonney says the dimensions are favorable.

NORTH OF AUGUSTA.

The test of the Towanda Oil & Gas Co. in 18-26-4 got a small showing of oil and a date of water at 2,610 feet and will probably be abandoned. The Prairie Oil & Gas Co. test 13, the southwest of the northeast of 45-24-4 also looks like a dead one.

The Clegg Oil Company test in 22-26-4 got a showing of gas at 1,600 feet and is now drilling at 1,600 with a hole full of water.

AT TORONTO.

Colonel Gilkes No. 7 in 11-26-11 is tested for eight barrels of oil and 1,628 feet and they cut the hole back to 1,412 to 1,419 to 1,419 and will be another for a gas well as Toronto offers no market.

The test of Warner and Hunt has finally been plugged at 1,721 feet. This is in 16-26-12.

AT STROUD.

The Mutual Oil & Gas Co. test in 1-13-4 got the sand from 2,862 to 2,878 feet and they cut the hole back to 2,842 to 2,848 to 2,848 and will go down. This sand was unbroken and it looks as though the gasfield is still there. It looks as though this territory was worth more drilling.

SINCLAIR STOCK ROOMING.

The last two days has witnessed a big advance in Sinclair stock, advancing from 6 to 10. The town officials yesterday were 14 and offered 15-14-4. It looks as though it is passed over here now that the tip was a good one.

AT VILLE.

The Sinclair Oil & Gas Co. test in the Long Farm in 18-19-5 is drilling at 2,155 feet and looks like a bad one.

The same company test on the Creekfoot farm in 24-19-5 is shut down on top of the sand at 3,220 feet.

AT BRISTOW.

The Joe Abraham-Gipsey test in 22-15-8 is delayed with collapsed casing about 2,100 feet.

The Gipsey test in 17-15-9 is still shut down at 2,222 feet waiting on a new cable.

AT BROKEN ARROW.

The Lone Star Gas company is underdrilling 17-15-1 at 2,150 feet and making preparation for a deeper test. A standard tank is built and a depth of 3,000 feet drilled if necessary. This company has three other locations to drill. Gas from the Lone Star field is bright.

AT WINFIELD.

The Cowley Oil company has made a location for a test in the northwest of the northeast of the northwest of 36-31-4.

AT HASKELL.

The Gipsey Oil company test in 15-15 has been plugged at 3,150 feet with a crooked hole and the rig skidded 40 feet for another try.

AT MADISON, KAN.

The McMan Oil company test in 24-21-10 got a small showing of oil in the lime at 2,268 to 2,212 feet.

AT ARDMORE.

The Sinclair Oil & Gas Co. is drilling at 1,600 feet in the test in 17-14-4.

AT HEDLUND.

The Ama Oil company test in 17-3-2 is dry and abandoned at 3,450 feet.

AT DOYLE.

Conway and others are ready to spend in their test in the northwest of the southeast of 21-20-4W.

AT HOME.

The Oklahoma-Louisiana Oil company test in 7-28-2 is dry and will probably be abandoned at 2,725 feet.

AT MARSHALL.

The Ama Oil company test in 5-2-16 has drilling at 3,580 feet.

PERSONS.

John R. Morrison and E. R. Kemp of the Sinclair company left yesterday for a trip east. Mr. Kemp will bring his family home when he returns.

ILLINOIS PIPE LINE TO INCREASE LINES

It is reported from Alton, Ill., that the Illinois Pipe Line company has started the construction of another eight-inch line to parallel the present one from this point to Marionville, Ill. Some time later these two lines will be extended to the Kansas oil field to extend the concession production in that country.

The Illinois Pipe Line company is also laying its lines from Neodesha, Kan., to Atchison, Ill., a distance of some three hundred miles.

Prairie Pipe Line stock has shown an advance of about fifty points and Illinois Pipe about thirty points in the last month. The doubling of the facilities of these pipe lines will greatly increase earnings for both companies. It is said, while their overhead expenses will be but slightly increased.

The Prairie Pipe Line company is also laying its lines from Neodesha, Kan., to Atchison, Ill., a distance of some three hundred miles.

Folks who are accustomed to feel well and heavy when they arise, splitting headache, stuffy from a cold, foul tongue, nasty breath, acid stomach, can, instead, feel as fresh as a lily by opening the valves of the system by eating, drinking and flushing with the whole of the internal poisons stagnant matter.

Everyone, whether ailing, sick or well, should each morning, after breakfast, drink a glass of real hot water with a teaspoonful of limestone to it to wash from the stomach, liver, kidneys and bowels the previous day's indigestible waste, sour bile and poisonous toxins, thus cleansing, sweetening and purifying the entire alimentary canal, putting more food into the stomach. The warmth of hot water and limestone, the warmth of an empty stomach is wonderfully invigorating. It cleanses out all the sour fermentations, gases, waste and acidity and gives one a splendid appetite for breakfast. While you are enjoying your breakfast the water and phosphate is quietly extracting a large volume of water from the blood and getting ready for a thorough flushing of all the body organs.

The millions of people who are bothered with constipation, bilious, peptic, stomach trouble, rheumatism, others who have yellow skin, blood disorders and sickly complexion are urged to get a quarter pound of limestone phosphate from the drug store which will cost very little, but is sufficient to make anyone a pronounced crank on the subject of internal sanitation.—Adv.
